

VACUUM PUMP REBUILDING SERVICES

• *Rotary Vane Pumps* • *Rotary Piston Pumps* • *Dry Pumps* • *Scroll Pumps* • *Blowers*

PUMP REBUILDS & SERVICE

Grauling Research will disassemble, decontaminate, and chemically clean each vacuum pump and perform a full inspection before reassembly and final testing. Tests performed include;

- 48 Hour Vacuum Test
- Mechanical and Electrical Performance
- Multi-Point Tolerance Inspection and Verification
- Seals, Gaskets and O-ring Replacements
- Monitor & Record Temperature and Pressure

All services include the installation of a minor rebuild kit and inspection for wear on pump components, all additional work including any major rebuild kits will be completed with customer approval.

WARRANTIES

All warranties for parts and workmanship are for 12 months and are included with all pump remanufactures. 12 month warranty excludes motors.

SERVICE EXPECTATIONS

With over 20 years of experience in pump service and remanufacturing, Grauling Research offers warranted pump rebuild services for a wide variety of vacuum pumps, ultimately providing cost savings for your business. Grauling Research will evaluate each pump within 3 days of receipt, communicate the suggested repairs and after your approval, the repair process begins.

- All major vacuum pump manufacturers' models are accepted for service and repair.
- Customer service response is within 24 hours of initial request to help minimize down times.
- On hand inventory of repair kits, spare parts and lubricants that minimize repair turnaround times.
- Experienced and thorough technicians.
